EXPERIENCE

Senior Experience Designer · Moody's

Dec 2024 – Present

- Lead design for a private credit analysis platform, replacing legacy Excel workflows with a purpose-built tool — using Figma Make and Claude Code to prototype and ship faster without sacrificing quality
- Significantly contributed to product strategy by shaping foundational understanding of user needs, influencing roadmap priorities, and partnering closely with product and engineering leadership
- Mentor junior designers and evolve a shared design system, raising the craft bar through structured design reviews and establishing scalable patterns across a growing product suite

Experience Designer · Moody's

June 2022 – Dec 2024

- Led end-to-end design for three 0 → 1 enterprise platforms that replaced Excel as the primary workflow for 200+ analysts worldwide, owning everything from discovery through high-fidelity delivery and launch
- Conducted 50+ research initiatives — interviews, usability studies, and concept evaluations — translating complex domain requirements into intuitive, scalable systems that drove measurable adoption
- Partnered closely with engineering to ensure faithful, high-quality implementation across every release, contributing reusable components and advocating for design standards throughout

UI Engineer / UX Research Intern · Adobe

May 2021 – Aug 2021

- Designed accessible data visualization components for a consumer-facing product, contributing to a design system used across a large-scale organization with a strong focus on inclusive design
- Led usability research with blind and low vision participants, synthesizing findings into actionable recommendations that directly shaped design system and engineering decisions
- Contributed production-ready HTML and CSS alongside design work, bridging design and engineering with fluency in both disciplines

EDUCATION

New York University

M.S. Integrated Digital Media · 2020–2022

Spelman College

B.S. Computer Science (3.92 GPA) · 2016–2020

SKILLS

End-to-End Product Design	Design Systems & Component Libraries	Figma, Figma Make & Claude Code
Complex Workflow & Systems Design	User Research & Insight Synthesis	AI-Assisted Design & Prototyping
Product Strategy & Roadmap Influence	Cross-functional Collaboration & Mentorship	Accessibility & Inclusive Design
